

*Our aim is to provide accurate and prompt reporting with our any compromises on patient healthcare.*

## **Excel Labs Dexa Scan (Bone Density)**

By incorporating, The Hologic (USA) Discovery DXA Technology, Excel Labs is now performing a quick and painless DEXA Scan, a bone density scan which is more effective than normal X-rays to identify patients at risk for osteoporosis and fractures. With exceptional precision and pinpoint accuracy, Hologic Discovery DXA technology delivers high quality images for your at-risk patients.

The Discovery DXA system offers exceptional precision & accuracy to help you identify patients with osteoporosis and/or who are at risk for fractures.

Speed & image quality, with images of the hip & spine captured in as fast as 10 seconds. Continuous automatic calibration, ensuring precise and consistent measurements results from exam to exam.

### **Highlighted Features**

- High Definition Instant Vertebral Fracture Assessment (IVA-HD).
- FRAX\* 10-year Fracture Risk Assessment.
- Advanced Body Composition Assessment and InnerCore Visceral Fat Assessment.
